Related PCI Standards

- PCI PTS/(POI/PIN/HSM)
- PCI PA-DSS
- P2PE

This one day course is aimed at organisations and individuals interested in understanding the requirements of Payment Card Industry Data Security Standard (PCI DSS) V3.2 and exactly how it applies to them. The course covers what is involved in a PCI DSS assessment and focuses on the interpretation of the Standard's 12 control requirements and the sub-requirements. The objective of the course is to provide delegates with clear and practical guidance on how to interpret the PCI DSS and how to meet the requirements within their organisation. The course, which is a combination of PowerPoint presentations and class discussions, focuses on providing an informal and interactive environment which is conducive to learning.

By the end of the day, delegates will be able to describe what the PCI DSS is, which of the self-assessment questionnaires or assessments apply to their organisation and what is involved in the assessment process. Delegates will also gain an understanding of some of the related PCI standards.

Who should attend?

This course is suitable for anyone who needs to understand what the objectives and requirements of the PCI DSS are and more importantly how their organisation complies with the Standard.

Why URM?

As a registered PCI Qualified Security Assessor (QSA) Company, URM is qualified to assess and audit all merchants and service providers. The course is delivered by a practising accredited QSA who brings practical real world experience to the classroom on how to address the requirements of the Standard and complete the self-assessment questionnaires.
